\*Hispanic origin is counted separately from ethnicity. This is consistent with the State of Washington definitions.

NOTES: - The state census data does not include a category for mixed ethnicity. In order to calculate the parity ratio, the clients in the Mixed/Other/Unknown category were distributed proportionally among the three non-caucasian ethnic categories. Parity is reached when a group receives services according to its percentage in the King County population. MHD contracts for parity levels of 1.0 or greater for ethnic minorities. (Less than 1.0 indicates the proportion of clients served is less than their proportion in the King County population)
